Ashwin Chembu

(341) 356-1722 | ashchembu@gmail.com | San Francisco, California | https://ashchembu.com

PROFILE

Full-stack engineer building applied-AI products, secure integrations, and data workflows with React, Python, and Node.js. Combines product implementation with testing and stakeholder delivery.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Frontend: React, Next.js, Tailwind CSS, responsive interfaces

Backend / Cloud: FastAPI, Node.js, Express, MongoDB, AWS S3, Firebase

AI / Quality: RAG, LangChain, vector search, pytest, Vitest, Playwright

EXPERIENCE

Business Technology Solutions Associate | ZS Associates

South San Francisco, CA | Jun 2024-Present

- Built **React** and **FastAPI** RAG assistants with AWS document ingestion and Redis services to support enterprise knowledge-search workflows.
- Developed Snowflake SQL pipelines across 327K+ records for identifier matching, specialty joins, address comparison, and quality reporting.
- Built **Python** and Flask endpoints connecting AWS S3 and Smartsheet APIs to automate document management and cloud data handoffs.
- Translated ambiguous stakeholder requirements into testable rules, API integrations, source-to-target mappings, and delivery documentation.

Founder and Lead Developer | Tallyrus

Jun 2023-Present

- Developed essay-feedback workflows with **Python,** LangChain, Pinecone, and OpenAI to support retrieval-augmented grading for educators.
- Designed **React** interfaces, rubric workflows, and iterative feedback loops that let educators review essays with consistent scoring logic.
- Built **React**/TypeScript and Express flows with Google OAuth, **MongoDB** persistence, secure sessions, and protected application routes.

Data Analyst / Web Development Lead | Tech4Good at UCSC

Mar 2023-Present

- Contributed 158 attributed commits to a collaborator-owned FigJam repository, implementing TypeScript chat, polling, and export workflows.
- Implemented 20+ attributed Node/Express REST routes with **MongoDB** persistence and logging for shared chat, text entry, and polling.
- Built Excel/XLSX export workflows and **Python**/Pandas analyses over 43.3K anonymized interaction rows spanning 2.8K verified session IDs.

PROJECTS

Sylk | Multi-Tenant Supply-Chain Platform

Private organization product | 2025-Present

- Built **React** and TypeScript shipment workflows with Firebase for organization onboarding, line items, fulfillment, files, and real-time chat.
- Enforced organization isolation with Firestore and Storage rules, separating retailer financial data from shared manufacturing workflows.
- Validated tenant permissions and product journeys with Vitest, Testing Library, Firebase emulators, and Playwright across supply-chain flows.

Lume | AI Meeting Intelligence

Dec 2025-Present

- Built **React** and Node/Express workflows with **MongoDB** and S3 to capture, store, search, and query meeting transcripts and project files.
- Designed a RAG engine with vector embeddings, intent routing, evidence extraction, and generator/critic refinement for citation-backed answers.
- Implemented reusable Project Brain knowledge bases that retain terminology and relationships from transcripts and seed files for grounded Q&A.

Private Filedrop | Secure File Exchange

2026

- Built password-protected uploads and API-key-protected Express interfaces with OpenAPI documentation for secure file-exchange workflows.
- Implemented local and S3-compatible storage, migration tooling, version history, and unguessable download links for durable file handoffs.
- Exposed MCP tools for file organization and retrieval, with HMAC-SHA256 webhooks and timing-safe credential checks for signed service events.

EDUCATION

University of California, Davis | **B.S. Computer Science** | **GPA: 3.7** Graduated Jun 2025

CERTIFICATIONS

AWS Certified Cloud Practitioner | Google Data Analytics Certificate
