Ashwin Chembu

(341) 356-1722 | ashchembu@gmail.com | Fremont, California | https://ashchembu.com

PROFILE

Solutions engineer translating ambiguous stakeholder needs into tested workflows, API integrations, prototypes, and delivery artifacts. Combines implementation across the stack with UAT, technical documentation, and product iteration.

TECHNICAL SKILLS

Implementation: Python, TypeScript, React, Node.js, FastAPI, Express
Integration: REST APIs, OpenAPI, MCP, AWS S3, MongoDB, Snowflake
Delivery: Requirements, UAT, acceptance criteria, decision logs, technical handoffs
Validation: API testing, data-quality checks, pytest, human-in-the-loop workflows

EXPERIENCE

Business Technology Solutions Associate | ZS Associates — South San Francisco, CA | Jun 2024-Present

- Translated ambiguous stakeholder requirements into testable rules, **API** integrations, source-to-target mappings, and delivery documentation.
- Converted stakeholder feedback and meeting transcripts into prioritized **UAT** items, enhancement backlogs, acceptance criteria, and timelines.
- Produced requirements, decision logs, executive presentations, and user guides to explain MDM and CRM workflows across stakeholder teams.
- Built **Python** and Flask endpoints connecting AWS S3 and Smartsheet APIs to automate document management and cloud data handoffs.

Founder and Lead Developer | Tallyrus — Jun 2023-Present

- Led product planning, user testing, iterative development, and fundraising, raising five figures to support essay-feedback product development.
- Designed React interfaces, rubric workflows, and iterative feedback loops that let educators review essays with consistent scoring logic.
- Built React/TypeScript and Express flows with Google OAuth, MongoDB persistence, secure sessions, and protected application routes.

Data Analyst / Web Development Lead | Tech4Good at UCSC — Mar 2023-Present

- Contributed 158 attributed commits to a collaborator-owned FigJam repository, implementing TypeScript chat, polling, and export workflows.
- Built anonymous responses, multi-select polls, vote changes, and admin controls with TypeScript and Figma APIs for group participation.
- Built Excel/XLSX export workflows and **Python**/Pandas analyses over 43.3K anonymized interaction rows spanning 2.8K verified session IDs.

PROJECTS

Private Filedrop | Secure File Exchange — 2026

- Built password-protected uploads and **API**-key-protected Express interfaces with **OpenAPI** documentation for secure file-exchange workflows.
- Implemented local and S3-compatible storage, migration tooling, version history, and unguessable download links for durable file handoffs.
- Deployed an Express service on Render and documented browser, REST, **OpenAPI,** and **MCP** workflows for secure cross-session file handoffs.

Lume | AI Meeting Intelligence — Dec 2025-Present

- Built React and Node/Express workflows with MongoDB and S3 to capture, store, search, and query meeting transcripts and project files.
- Implemented reusable Project Brain knowledge bases that retain terminology and relationships from transcripts and seed files for grounded Q&A.
- Designed a RAG engine with vector embeddings, intent routing, evidence extraction, and generator/critic refinement for citation-backed answers.

Human-in-the-Loop Application Operations — Private automation system

- Built Node.js and **Python** workflows mapping role requirements to verified evidence and generating reproducible, role-specific resumes.
- Built Telegram approval cards and JSONL logs with exactly-once decisions to gate submission on persisted, application-specific human approval.
- Integrated ATS extraction, PDF render review, duplicate prevention, and exact-document checks to validate application files before submission.

EDUCATION

University of California, Davis | **B.S. Computer Science** | **GPA: 3.7** — Graduated Jun 2025

CERTIFICATIONS

AWS Certified Cloud Practitioner | Google Data Analytics Certificate
